## Save wind turbine jobs!

We the undersigned petition the Prime Minister to prevent the closure of Vestas Blades UK, wind turbine blade factory, on the Isle of Wight.

Name	Address	Signature	

On Monday 13 July, while opening an onshore wind farm in the south of England, Energy and Climate Change Secretary Ed Miliband confirmed the government's commitment to expanding wind energy. Expansion can help the UK to increase the renewable proportion of energy production by 2020 and can also help to create – and save – jobs.

To show that it is earnest about this commitment, we urge the government to do all that it can to prevent the closure of Vestas Blades UK, a wind turbine blade plant on the Isle of Wight.
